RISKS & MITIGATIONS

Olive oil price volatility

Two regional growers contracted. Annual forward-buy of 80% of demand. Spelt-oil alternative recipe pre-tested.

Food-grade lye regulation

Licensed lye supplier since W1. Safety SOP + ventilation audit quarterly. Stamp-workshops skip lye handling.

Single-artisan key-person

Apprentice trained on full saponification protocol by month 4. Printed recipe book. Shared ownership model.

Marseille taught Europe to wash. Over four centuries the recipe shrank to seven ingredients and one instruction: take your time. SAVON 7 is one room in Le Panier, one copper cauldron, four weeks of waiting, and forty bars a week. We do not innovate. We remember.
